**Subject:** Price manipulation of silver--please respond

## CFTC Committee Members,

Last spring you held meetings to determine if there is price manipulation of silver. It is clear to me that there is, especially by JP Morgan. The short position held by JP Morgan and others is enormous.

When are you going to do something about it? Arn't you paid to ensure free markets are operating? If you do not believe there is price manipulation in silver, please forward to me proof of this.

Thank you.

Dave Sellars
